WhatisBoozeMoon?

It's time to go interstellar with our very own BoozeMoon beer. You'll be able to get down and party until the moon comes up…and then party some more when the profit rolls in. Why? Because with the BoozeMoon token, you get the best of both worlds – beer AND heavy profit!

BoozeMoon has already formed a partnership with a brewery based in central Europe, which is where we will produce our exclusive and tasty BoozeMoon crypto beer! And that's just the start for the BoozeMoon brand.

Our BoozeMoon token is rug safe, secure and transparent, and already audited by a big smart contract auditing company. With this, you can guarantee that it isa safe and lucrative investment. We want to take our token to the moon and beyond to ensure that BoozeMoon becomes the next big beer – think of it as our own giant leap for mankind!

BoozeMoon Features

BoozeMoon is an auto-staking and auto-liquidity token with a 5% tax on every transaction. This fee is used for the following:

- Reflection: 1.65% of every transaction will be redistributed to all BOOZE holders, in proportion to their wallet token balance, implementing auto-staking.This means the amount of tokens in your wallet will forever increase as people transact. In effect, holders get rewarded for just holding BOOZE in their wallets.
- Locked Auto Liquidity: 2% of every transaction is converted into BOOZE/BNB LP tokens, which contributes to the liquidity pool on pancakeswap.
- This continuously increases the liquidity pool, which leads to a permanently growing price floor of BOOZE.
- Auto Burning: 1.35% of every transaction is burned by sending it to the dEaD address!This leads to an ever decreasing, circulating supply, and our holders' token value is on a continuous rise upwards!

Why is BoozeMoon Safe?

BoozeMoon is a rug safe token with several features to maintain security:

- Contract Ownership
  The ownership has been renounced to the 0x0000000000000000000000000000000000000000 address upon creation.
- Locked LP tokens
  100% of the initial LP tokens created upon BOOZE/BNB pair creation will be burned by sending them to the dEaD address!
- Token Vesting
  All tokens allocated to Team wallets are safely locked away in individual TokenVaults, and vest over time using a Vesting Smart contract. This means that users can be assured the team is invested in the project.
- Un-mintable: The BoozeMoon token does not have a mint function. The entire supply is minted at TGE, and never anywhere else! Infact, the Auto-Burning feature continuously reduces the circulating supply.
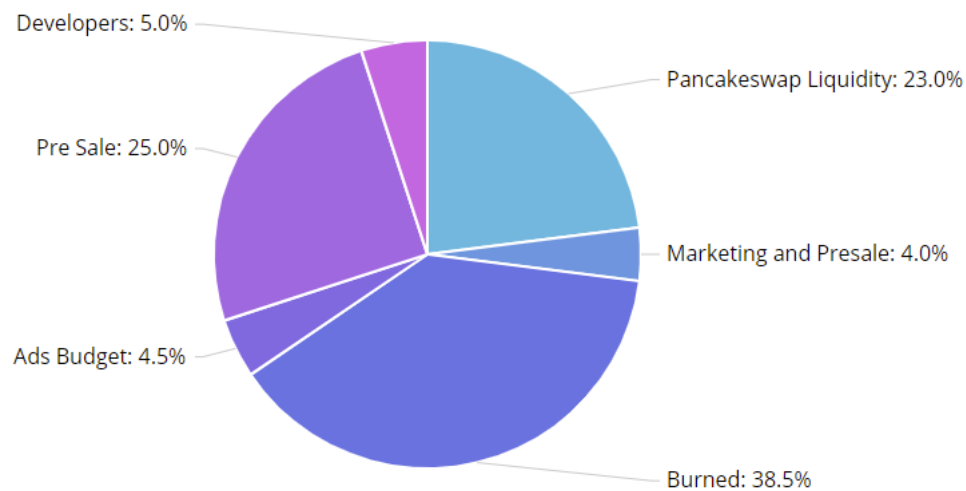

Our smart contract has already been audited by the reputable auditing company Techrate andis considered safe and secure. You can find the detailed auditing report here.

Tokenomics

Wondering what we are doing with all these BoozeMoon tokens? Here is the exact overview:

- **TOTAL SUPPLY:** 1,000,000,000,000,000

- **Burned:** 385,000,000,000,000

- **Pre Sale:** 250,000,000,000,000

- **Pancakeswap Liquidity:** 230,000,000,000,000

- **Ads Budget (locked for 5 days):** 45,000,000,000,000

- **Other Marketing and Presale Fees:** 40,000,000,000,000

- **Developers (locked for 10 days initially plus 30% penalty fee):** 50,000,000,000,000

This leads to the following % allocation:

We want to be completely honest about our token. 45% of our tokens will go into the BOOZE/BNB liquidity pool. We will also be focusing on the marketing aspect of BoozeMoon in a big way. Therefore, we have reserved a 5% ads budget, which will be used to make our coin as popular as possible. Therefore, we have already secured advertising space on PooCoin. But do not worry; the ad budget will only be made available after the first five days of the project.

We have also reserved 10% to cover the fees for the presale, and to invest into more social media marketing activities. Most of this budget will be spent on getting the token trending on Twitter, Reddit and TikTok.

Finally, our developers can only access their tokens after 10 days. However, if a developer decides to sell his tokens before six months into the project, there will be a 30% penalty fee applied. The tokens from this penalty fee will be burned straight away.

If you have additional questionsregarding our Tokenomics, feel free to contact us via our Telegram channel.

Roadmap

For the upcoming weeks and months,BoozeMoon will go big with its rollout, coinciding withthe return of our party lives.We will have the perfect booze for you to celebrate with. Here are our plans looking ahead:
